

Talk Homework

For your talk homework this week I would like you to talk about your times tables (2,5,10). What does X mean? What words mean the same as 'times'? Can you explain to someone how we could solve a times table e.g. 2×10 or 4×5 ? Think about what we have been doing in class.

Spelling

Spelling tests will now take place on a Wednesday. You need to use your spelling practice book to practise the new spellings daily. Remember the different ways you can learn your spellings. Here are your new spellings: (Some of the words are repeated from previous weeks and linked to our topic, as it is important that we know how to spell these words correctly)

Wednesday
water
Thursday
south
north

Maths

Please continue to practise your number bonds to 10/20 (pairs of numbers that make 10/20). If you have completed these then you need to practise your 2, 5 and 10 times tables.

This week we have been looking at the two and five times table, can you write them out? $1 \times 2 =$, $2 \times 2 =$

Daily Reading

Remember to read every day and record it in your reading record. If you read each day then your name gets added to a raffle prize, which will be drawn at the end of the term.

You must bring your reading record into school daily. Reading books are going to be changed on a Tuesday and Friday, dependent on whether you have shared your books at home with an adult or are fluent in your reading.

Topic Project

For this half term's project, I would like you tell me about the 7 continents or the 5 oceans. This might be where they are in the world, what food comes from each continent, what animals live in each ocean or continent. You could make a presentation (video or powerpoint), create a large map showing each ocean/continent or make an information leaflet.

As you have until the end of the term, please make sure that you do a great job and don't rush your project.
